

VERIHIRE

AI-Powered Interview Assessment & Hiring Verification Platform

WORKING PROTOTYPE (MVP)

Prepared By: Robert Niyonkuru

Institution: Tumba College of Technology

Date: 2026

Document Type: Supporting Evidence for Business Competition

This document serves as supporting evidence that VeriHire is a real working prototype currently under development.

PROJECT OVERVIEW

THE PROBLEM

Organizations across Rwanda and beyond struggle with fundamental recruitment challenges that threaten the integrity and efficiency of their hiring processes. Interview fraud, including impersonation and cheating behaviors, has become increasingly prevalent in remote hiring environments. Manual screening processes are slow and prone to human bias, while the lack of standardized evaluation frameworks leads to inconsistent results.

Interview Fraud

- Impersonation
- Cheating behaviors
- Credential falsification

Inefficient Screening

- Time-consuming processes
- Manual evaluation
- Delayed decisions

Subjective Evaluation

- Human bias
- Inconsistent scoring
- Lack of standards

THE SOLUTION

VeriHire addresses these challenges through an integrated AI-powered platform that combines advanced technologies to streamline and secure the hiring process.

AI-Assisted Written Assessments

- Smart question generation
- Automated scoring
- Keyword analysis

Live Video Interviews

- WebRTC integration
- Real-time monitoring
- Session recording

Anti-Cheat System

- Copy/paste detection
- Tab switching alerts
- Integrity scoring

Professional Reporting

- PDF generation
- Candidate ranking
- Performance analytics

MISSION: To help organizations make smarter and more trustworthy hiring decisions through AI-powered verification and assessment.

KEY FEATURES

FOR CANDIDATES

- ✓ Secure Registration & Login
- ✓ Personal Dashboard
- ✓ Written Interview Assessments
- ✓ Live Video Interview Sessions
- ✓ Progress Tracking System
- ✓ Result History & Analytics

AI-POWERED CAPABILITIES

- ✓ Automated Keyword Scoring
- ✓ Integrity Score Calculation
- ✓ Real-Time Evaluation Engine
- ✓ Anti-Cheat Monitoring System
- ✓ Behavioral Pattern Detection
- ✓ Smart Report Generation

FOR EMPLOYERS

- ✓ Company Dashboard
- ✓ Interview Campaign Creation
- ✓ Question Bank Management
- ✓ Interview Session Management
- ✓ Candidate Ranking System
- ✓ PDF Report Generation

PLATFORM HIGHLIGHT VeriHire integrates written assessments, live video interviews, and

SYSTEM SCREENSHOTS

Evidence of working prototype — all screenshots captured from the live application.

Landing Page
Public-facing homepage with call-to-action buttons.

Campaign Creation
Employer interface for creating interview campaigns.

Question Bank
Question management system with type and difficulty controls.

Candidate Ranking
Performance-based ranking with score visualization.

SYSTEM SCREENSHOTS (CONTINUED)

Live Interview Sessions

WebRTC-powered video interview rooms with session management.

Live Video Interview

Documented video interview with real-time proctoring.

Written Interview Interface

Structured assessment with timer and anti-cheat monitoring.

Candidate Application

Secure registration and application form for candidates.

DATABASE & SYSTEM ARCHITECTURE

SYSTEM WORKFLOW

Copy/Paste Detection

Monitors clipboard activity during assessments. Flags suspicious copying.

Tab Switching Detection

Tracks browser tab switches during interviews. Alerts on unauthorized navigation.

Session Monitoring

Live camera feed monitoring during video interviews.

Integrity Scoring

Calculates a comprehensive trust score based on behavior analysis.

PURPOSE: Reduce cheating by 90% and improve interview credibility through multi-layer security.

CURRENT DEVELOPMENT STATUS

WORKING MVP PROTOTYPE

All core features have been implemented and tested.

COMPLETED FEATURES

- ✓ Authentication System
- ✓ Company Management
- ✓ Candidate Management
- ✓ Written Interview Module
- ✓ Live Interview Module (WebRTC)
- ✓ AI Scoring Engine
- ✓ PDF Report Generation
- ✓ Subscription System

EVIDENCE OF WORKING PROTOTYPE

The screenshots provided in this document demonstrate a fully functional prototype with real user accounts.

Live Users	Video Calls	AI Scoring	Reports
Real candidate and employer accounts, verified email verification, and active sessions.	WebRTC integration tested with real-time video streaming and audio recording.	Automated keyword analysis and scoring algorithm implemented.	PDF generation pipeline for interview reports.

DEVELOPMENT TIMELINE

Candidate Dashboard

Live candidate dashboard showing active sessions and results.

FUTURE ROADMAP & CONCLUSION

PLANNED IMPROVEMENTS

- **Facial Attention Analysis**
| AI-powered eye tracking and attention monitoring during video interviews.
- **Mobile Application**
| Native iOS and Android apps for on-the-go interview management.
- **Advanced AI Evaluation**
| Natural language processing for deeper response analysis and sentiment scoring.
- **Behavioral Analysis**
| Pattern recognition for identifying stress, confidence, and communication skills.
- **Multi-language Support**
| Support for Kinyarwanda, English, French, and Swahili interviews.
- **National Scale Deployment**
| Partnerships with Rwandan government and educational institutions.

CONCLUSION

VeriHire is designed to modernize recruitment by combining artificial intelligence, interview analysis, and candidate verification into a single platform. With a working MVP already demonstrating effectiveness, the project is positioned to become Rwanda's trusted AI-powered hiring platform.

VISION: Become Rwanda's trusted AI-powered hiring platform.

Target Impact: 60% faster hiring | 90% fraud reduction | 50+ organizations | 5,000+ candidates annually

VERIHIRE

Smart Hiring. Verified Talent.
