

VeriHire

AI-Powered Interview Assessment & Hiring Verification Platform

Prepared by:

Robert Niyonkuru

Tumba College of Technology

Challenges in Recruitment

Interview Cheating & Impersonation

Candidates use unfair means during remote interviews, compromising integrity

Time-Consuming Screening

Manual screening processes take weeks, delaying critical hires

Lack of Objective Evaluation

Subjective assessments lead to biased and inconsistent hiring decisions

Manual Interview Reporting

HR teams spend hours compiling reports instead of focusing on strategy

Difficulty Verifying Skills

Hard to validate claimed expertise without rigorous testing frameworks

Result: Organizations hire the wrong people and waste resources.

VeriHire Solution

An AI-powered platform that transforms hiring:

- ✓ Conducts comprehensive written interviews with smart question generation
- ✓ Supports live video interviews with real-time monitoring capabilities
- ✓ Automatically scores candidates using advanced AI algorithms
- ✓ Detects cheating behaviors through multi-layer integrity checks
- ✓ Generates professional interview reports instantly
- ✓ Helps organizations hire with confidence and precision

Key Features

■ For Candidates

- Secure account creation
- Written interview assessments
- Live interview participation
- Real-time feedback
- Progress tracking dashboard

■ For Employers

- Job campaign management
- Interview creation & customization
- Candidate ranking system
- AI-assisted evaluation
- PDF report generation
